

VENN Health Partners

(www.vennhp.com) is a professional services firm with decades of experience as translators to providers, patients, and payers, improving their communication, collaboration, and ultimately their care coordination. Our professional service offerings ensure that clinical, business, and technical requirements are clear to all key stakeholders enabling effective, efficient engagement.

VHP leaders understand health system and vendor dynamics and how to make them both successful. Our focus is on ***Healthcare Transformation, Enterprise Imaging, Telehealth, Digital Hospitals, and Data Analytics***. While we are proficient in augmenting your existing staff with subject matter experts for a competitive price, our strength resides in program ownership.

We Connect the Dots...

Healthcare Transformation

- Program Management in ePrescription
- Program Management of Radiology Clinical Decision Support
- Project Management of Long Term Care EMR

Enterprise Imaging/Telehealth

- Program Management of Enterprise Imaging Rollout

New Digital Hospital

- Project Management/Coordination/Technical Build for new Digital Hospital

Data Analytics

- Designed and built Comprehensive Care for Joint Replacement (CJR) dashboard

VENN Health Partners

Our engagements include:

- **Healthcare Transformation**

- **Program Management in ePrescription:**
 - \$5M capital project – controlled and non-controlled, system wide rollout
- **Program Management of Radiology Clinical Decision Support:**
 - \$3M capital project – system wide rollout

Actions:

- Completed discovery efforts to validate overall impact and determine current state readiness, prepared budget and defined roadmap required to complete mandate.
 - Tracked all IT related projects, managed all operational and institutional process changes, and oversaw interaction and communication with the system's governance structure.
 - Provided compliance metrics pre and post implementation.
 - Built strong relationships with appropriate regulatory organizations (BNE and CMS) to ensure proper awareness of latest information and changing requirements
- **Project Management of Long Term Care EMR:**
 - \$3M+ capital project – system wide rollout
 - Managed rapid vendor selection process including contract negotiation and execution
 - Project management for rapid deployment of first two phases of implementation
 - Ongoing optimizations

- **Enterprise Imaging/Telehealth**

- **Program Management of Enterprise Imaging Rollout:**
 - \$20M+ Capital project – system wide rollout
 - Collaborated with Radiology service line, Corporate IT, and all vendor partners
 - Devised rollout timeline strategy to meet operational budget needs of service line
 - Ensured successful integration with all existent IT systems (ADT/Orders/Results)
 - Developed new operational workflows to take advantage of new suite of tools

- **New Digital Hospital**

- **Project Management/Coordination/Technical Build for new Digital Hospital**
 - \$50M Capital Project for IT requirements
 - Design/Build data centers to ensure availability of all new systems
 - Over 10 staff onsite for long term support of this strategic program

- **Data Analytics**

- **Designed and built Comprehensive Care for Joint Replacement (CJR) dashboard**
 - Analyzed customer CMS data to create appropriate data model
 - Reviewed all existing and required KPIs
 - Designed interactive visualization dashboard
 - Framework design prepared for additional clinical data inputs (EMR, PRO, SDOC)
